Replace the batteries and set the volume at a comfortable level.

Trouble Shooting

STROLLER WON'T FOLD
- Check to see that the seat belt is not caught in the side.
- Make sure front swivels are locked.
- Make sure the backrest is in the upright position.
- Remove all items from the basket.
- Remove your player from back pocket of the canopy.

DIFFICULT TO STEER/STROLLER PULLS TO ONE SIDE
- Remove any items hanging from the handle.
- Make sure weight in basket is distributed evenly.
- Check that the brakes are not in the locked position.
- Clean and add silicone to wheels, if necessary.

DIFFICULT TO GET UP CURBS
- Pulling stroller backward makes going up a curb difficult, and could pose a safety hazard. Pull the handle up to lift the rear wheels onto the curb, then pull the stroller backward until the front wheels clear.

DIFFICULT GOING DOWN CURBS
- Turn stroller around, bringing rear wheels toward the edge of the curb. Gently lower rear wheels onto the surface below. Once the rear wheels have landed, guide the front portion of the stroller, using the armrest as support.

Routine Maintenance

STORE IN A COOL AND DRY AREA, especially in the summer. Do not store the stroller in the trunk of a vehicle.

SEAT CUSHION
The seat cushion is machine washable. Set to gentle cycle using warm water and a mild detergent. Do not use bleach. Lay seat cushion and canopy and car seat covers flat to dry in shaded area. Do not machine dry. To prevent color fading, do not leave soaking for a long period. If the seat cushion is frayed or unraveling, discontinue use and call Consumer Affairs for further instruction.

CANOPY, SEAT BELT, FIXED BASE SEAT, TRAVEL BAG, STROLLER PACK AND BASKET
Hand wash with a soft brush. Wipe out excess water with a dry cloth and dry in a shaded area. For stubborn dirt, dilute a mild detergent then apply directly to the dirty area. Wipe out the detergent.

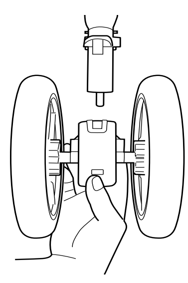

MAIN BODY
Briskly wipe off any mud and dirt. To clean the body, wipe with a damp cloth then wipe out any traces of moisture on the body with a dry cloth. The main body might become moldy and musty if not wiped dry. Excessive exposure to the sun could cause premature color fading of stroller plastic and fabric.

WHEEL ASSEMBLIES
After prolonged normal use, the wheels of your stroller may not swivel or turn as easily as when the stroller was new. This is usually due to a buildup of dirt in the swivel mechanism. Before adding lubrication, remove the swivel wheels by pressing the release button and wiping off mud and dirt. **Do not use soap and water to wash wheels.** Periodically check that all screws, bolts and nuts are tight.

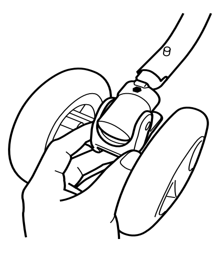

Avoid lubricating the swivel wheels whenever possible. Excessive lubrication or adding lubricant to swivel wheels when new may cause them to develop a shimmy or wobble that may quicken their deterioration. Add silicone* to **the wheel assemblies** in small amounts.

Do not use lubricants because oil attracts dust and would hinder the movement rather than improve it.

*Silicone spray is available in varying size cans at most hardware stores.
